TECHNICAL SKILLS

- HTML 5, CSS, JAVASCRIPT, DOM, Bootstrap
- REACT.JS (TypeScript)
- Python (**Database**: MySQL)

PROJECTS

- **TITLE:** Frontend Developer | Web Design Enthusiast (Portfolio)

  Description: I specialize in building responsive web interfaces using **HTML, CSS, JS, DOM** & **Bootstrap**. I focus on clean code, performance, & user-centered Design. My Portfolio highlights the projects I've built and the technologies I love working with.

- **TITLE**: Beauty Mart Webpage

Description: Beauty Mart is a beauty and personal care webpage designed to showcase high-quality products in a clean and user-friendly layout. This project focuses on modern UI design, responsive structure, and easy navigation for a smooth user experience.
Tools: HTML, CSS.

- **TITLE**: Image Gallery

  Description: A fully responsive and the gallery displays images in a grid layout. When a user clicks an image, a lightbox popup opens to show a larger view. I also implemented the next and previous navigation using JavaScript. Additionally, I added a filter feature where users can view images based on categories like nature or animals.
  Tools: HTML, CSS, & JavaScript.

- **TITLE**: Landing Page – Web Developer Internship

  Description: A modern and responsive landing page designed for a Web Developer Internship program. This project focuses on clean UI design, clear content structure, and user-friendly layout to highlight internship details effectively. **Tools**: HTML, CSS.

- **TITLE**: Calculator

  Description: Developed a responsive calculator web application capable of performing basic arithmetic operations including addition, subtraction, multiplication, division, and percentage calculations. Implemented interactive functionality using JavaScript. Added keyboard support for enhanced user experience and ensured controlled input handling to prevent invalid expressions. **Tools**: HTML, CSS, & JavaScript.

- **TITLE:** Python-MySQL Mobile Product CRUD System

  Description: A Python-based console application designed to manage mobile product details using a MySQL database. The system allows users to perform full CRUD operations such as adding new mobile products, viewing product lists, updating details, and deleting records. It ensures smooth database interaction using mysql.connector and helps to store structured information like mobile name, model, price, color, and RAM.
